Color in context

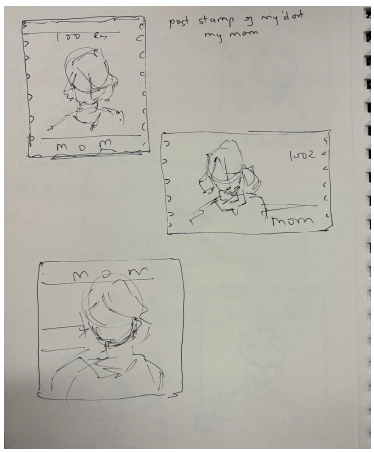

THIS PAGE REPRESENTS ALL THE WORK CREATED IN THE CLASS COLOUR IN CONTEXT.

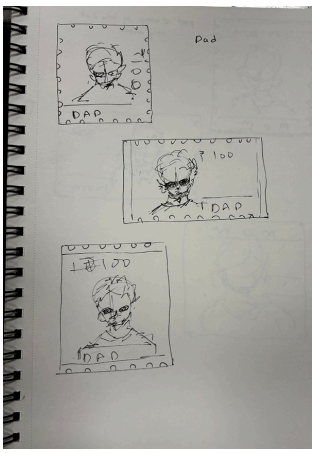

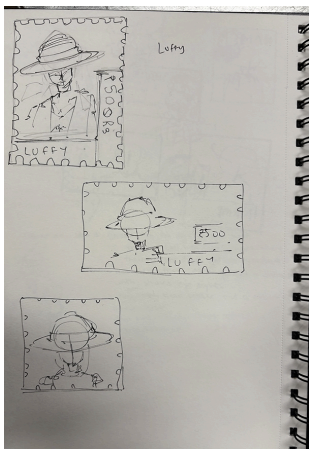

PROJECT- POSTAGE STAMP

This postage stamp was created of the character Luffy from One Piece, using digital media (procreate) to do the line-work and transferring it onto paper to go over it with watercolour. In the end giving it a crumpled effect to match the vibe of the pirate themed show.

PROJECT- ABSTRACT MEANING OF A WORD

This concept of this project was to take the randomly allotted word, which was hostile and create 3 interpretations of it using a harmonious colour palette and a disorderly palette.

The word I was given was Hostile. When I first saw it, I immediately thought about aggression, tension, and emotional intensity. I knew that the way the word was styled would be just as important as the colours I chose. Because of that, I focused on typography first sharp strokes, jagged edges, and expressive brush movements that make the word feel unstable and confrontational

PROJECT 3- HELIOS- A TIME WHERE THE EARTH WAS THE CENTER

In this piece, the assignment was to use a split complimentary colour scheme. I used the schemes of blue, yellow orange, red orange AND orange, green blue, violet blue. I chose the topic of Geocentricism to Heliocentrism, the transition from mankind's belief of the earth being the centre of the universe to the sun being the centre of the universe I wanted to capture the specific moment of people reading the newspaper where it was published, and the overall influence religion and the church had on the people. Since the work was done digitally and then printed and mounted, I had to adjust the saturation and values so the contrast between warm and cool colours would still be visible after printing.
